

Fact Sheet

Product Description

In Storm Lancers, players crash land on a living planet built around a powerful source of reality magic. They believe they are facing their end. And yet, unexplainably, they have been brought back to life — and tasked with exploring this strange planet, battling their way to its fractured core, and fixing all of reality before it collapses. Players will step into the world of Cryptica and master the art of frenetic combat, nimble evasions, and powerful augmentations as they defeat the Harvesters, an alien machine race that feeds on life, energy, and magic.

Designed to keep the heart racing and reflexes sharpened, Storm Lancers gives players a sense of adventure constantly on the move. Players traverse five ever-shifting biomes where each leap, slash, and dash propels them deeper into a vibrant alien world — only to be met by even stronger and more challenging enemies.

Storm Lancers lets players shape their playstyle through the Storm Bindings system, which enhances player abilities in specific ways while introducing trade-offs in others. Each build unlocks distinct perks and synergies, especially when combined with powerful evasion techniques and a wide arsenal of more than a dozen weapon types. As players progress deeper toward the planet's core, they'll uncover new items, mechanics, and abilities transforming them into true legends of Cryptica.
